**RE: Bayway Refinery Complex Site Remediation
Submittal of Semi-Annual Progress Report –
Period January 1, 2022 through June 30, 2022
Administrative Consent Order (ACO), Effective 11/27/1991
SRP PI#008282**

Dear Mr. Zielinski:

Enclosed is an electronic copy of the Semi-Annual Progress Report (SAPR) covering the period January 1, 2022 through June 30, 2022, for the Bayway Refinery Complex (BRC). This report provides updated data and the remedial status on the following: Remedial Strategy Roadmap, third party spills and releases, Interim Remedial Measures Monitoring (IRMs), Remedial Action Progress Report and Remedial action Operation, Maintenance, and Monitoring.

This 1H 2022 SAPR has been prepared on behalf of ExxonMobil Environmental and Property Solution Company by Kleinfelder. The 1H 2022 SAPR includes the following recommendation that ExxonMobil Environmental and Property Solution Company is requesting approval to implement:

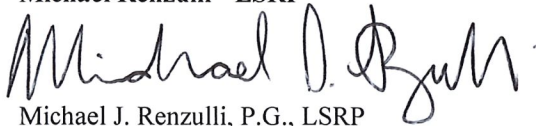

- Section 5.11 – Sludge Lagoon Operable Unit Remediation:
 - Discontinue the annual submittal of ground water elevation contours.

As LSRP for the BRC, I have reviewed the above recommendation and based on the supporting data and using professional judgement, I find them to be acceptable. Additionally, I find the site status information and the presentation of the data in the SAPR to be acceptable and compliant with requirements contained with N.J.A.C 7:26E. I find the current and proposed actions and recommendations within the SAPR to be protective of human health and the environment and to be consistent with the current version of the Remediation Strategy Road Map document for the site.

Please contact me at (609) 249-2699 should you have any questions.

Best regards,

Michael Renzulli - LSRP

Michael J. Renzulli, P.G., LSRP
